

120kWh outdoor unit for mountainous Canadian users

Overview

This isn't just a battery; it's a fully integrated power fortress, combining a massive 120kWh LiFePO4 battery bank, a powerful 50kW inverter, and a sophisticated thermal management system within a single, ruggedized outdoor cabinet. Modern off-grid solar power systems are designed to be resilient and user-friendly. Smart monitoring tools allow cabin owners to track energy production and consumption in real time, ensuring they always know how much power they have available. For many, this level of visibility into energy use. EcoFlow's best portable power stations are battery-powered generators with multiple charging options that come in a wide range of capacities, weights, and sizes for almost any application. From camping and RVs to whole-home backup and rooftop solar power.
