

25kW Energy Storage Container for Port Use

Overview

Housed in a 20-foot container, this system integrates solar PV, energy storage, and advanced control components into a single unit, making it ideal for remote industries, construction sites, disaster recovery centers, and high-demand mobile energy applications. The PFIC25K55P30 is a compact all-in-one solar storage system integrating a 25kW power output, 55kWh energy storage capacity, and 30kWp high-efficiency foldable PV modules—engineered for off-grid, remote, and temporary power scenarios. As the shift towards renewable energy continues, batteries are becoming crucial to ensure that solar containers and. Interport has worked with various power generation and energy customers to deliver unique solutions whether storing generators or providing a unit to recharge batteries. These units can be placed almost anywhere, making them incredibly versatile for different.

25kW Energy Storage Container for Port Use

Shipping Containers for Power Generation & Energy Storage

Interport's shipping containers can be fully customized with a wide variety of modification options, depending on your power generation source and battery storage needs.
