

# 3kW solar power generation solution

## Overview

---

A 3-kW solar system is made up of solar panels, a solar inverter and a mounting structure, among other components. This system captures energy from the sun and converts it into electricity to power your home or appliances. Wondering if a 3-kilowatt (kW) solar system is large enough to power your home or too large for your do-it-yourself (DIY) project?

Below, we'll outline everything you need to know about 3-kW solar systems, including what they can power, how much they cost and how to determine if they're the right. 3KW solar power system (off-the-grid, standalone) is the obvious alternative to one that is grid-tied. For homeowners that have access to the grid, off-grid solar systems are usually out of question. With a 3kW capacity, this type of inverter is. This 3,000-watt string inverter kit serves as a great entry-level, budget-friendly option for ground sites that receive full sunlight (no shade or obstructions). It is typically installed on the rooftop and requires around \$7200 - \$10,800.
