

# 5MW Project Solution for Lithium Battery Cabinets in Photovoltaic Power Plants

## Overview

---

The battery system is a containerized solution that integrates 10 racks of LFP batteries for the 4 MWh model and 12 racks of LFP batteries for the 5 MWh model, and offers a high energy density for utility applications. LFP battery with high safety and high cycle life. It is placed in an outdoor prefabricated cabin and has the characteristics of modularization, easy installation and maintenance. The internal integrated battery cluster, Combiner box, Comprehensive cabinet, fire protection system, air cooling. Also as lithium-ion (Li-ion), sodium sulphur and lead-acid batteries, can be used for grid on a modularly disconnect and fuse, it is unnecessary to add further switching and protection. They provide rack-level protection and connection/disconnection of individual racks from the system. A typical. CPS is excited to launch the new 4/5 MWh Battery Energy Storage System for the North American market. Capacity meaning: It can deliver 5MW for 1 hour, or lower power output for a longer duration. 3□ Extendable-modular, adding more capacities as needed, Nx5MWh. 5□ Long lifespan, up to 6000 cycles.

## 5MW Project Solution for Lithium Battery Cabinets in Photovoltaic P

### Key aspects of a 5MWh+ energy storage system

More than a month ago, CATL's 5MWh EnerD series liquid-cooled energy storage prefabricated cabin system took the lead in successfully achieving the world's first mass production delivery.
