

# Africa Commercial and Industrial Energy Storage Project

## Overview

---

South Africa hosts the biggest single installation: Scatec's Kenhardt 1-2-3 complex, combining 1,140 MWh of batteries with large-scale solar to provide dispatchable power under a long-term contract. Egypt follows with the Abydos 1 BESS at 300 MWh, developed by AMEA Power. Looking at all of Africa at once is by no means doing the continent justice. Yet, comparatively, it's still such early days. A snapshot of the battery energy storage landscape reveals contrasts, with a handful of nations leading a significant buildout of utility-scale battery energy storage systems. As a global leader in the energy storage manufacturing sector, GSL ENERGY has been deeply rooted in the African market for years, providing customized solar energy storage solutions for residential, commercial, and industrial customers. AFSIA's 2025 Africa Solar Outlook identified. This publication was prepared by the staff of the African Union Development Agency - NEPAD in partnership with experts from the Africa-EU Energy Partnership (AEEP). The findings, interpretations, and conclusions expressed in this work do not necessarily reflect the views of AUDA-NEPAD. The. Interview with Vincent Ombajo, Managing Director at Collective Energy Africa What is the most notable development you have witnessed in the past 12 months?

There are 3 main noticeable developments for storage in Africa: The first two elements are direct drivers of the exponential uptake of storage. Stable on/off-grid power with 50-750 kW output and 120-3132 kWh storage capacity for continuous commercial operations. Designed for Africa's small-scale businesses, AlphaESS solutions combine flexibility with guaranteed 24/7 electricity stability. Combine solar, battery, and diesel for.

## Africa Commercial and Industrial Energy Storage Project

### 'Energy storage boom' in Africa from 31MWh in 2017 to 1,600MWh in ...

Africa's energy storage market has seen a boom since 2017, having risen from just 31MWh to 1,600MWh in 2024, according to trade body AFSIA Solar's latest report.
