

# After-sales issues of LONGi Green Energy photovoltaic panels

## Overview

---

The report highlights the impact of intensified industry competition, declining prices and gross profit margins for PERC and TOPCon products, and reduced capacity utilization due to technological advancements. Reflecting on 2024, LONGi Green Energy experienced a significant year-on-year decline in revenue, leading to substantial net loss. This year has proven to be the most challenging since our initial public offering. The management team and I express our sincere regret regarding these outcomes and are. In the 2024 interim report, the leading photovoltaic company LONGi Green Energy (601012. China's leading solar panel manufacturer, Longi Green Energy Technology Co. shares dropped after the company warned it may report another loss in 2025 due to low product prices and cost pressures. SH) held its 2025 semi-annual earnings briefing via platforms such as the Shanghai Stock Exchange Roadshow Center. Previously, there were screenshots circulating online claiming that LONGi.
