

# Angola High Field solar Panels

## Overview

---

This project is the centerpiece of Angola's efforts to replace thermal power stations, displace expensive diesel usage from generators, and reduce pollution. Diversifying Angola's energy matrix, this project utilizes cutting-edge clean energy technology that will pay dividends for. Angola's solar energy program has reached a milestone with the completion of seven photovoltaic plants that collectively underscore the country's pivot toward renewable power and away from diesel-based generation. Officials marked the achievement in early September with the inauguration of the. Sun Africa has completed a 370 MWp solar PV project in Angola, consisting of seven utility-scale solar plants in the provinces of Benguela, Huambo, Bié, and Lunda Norte. The Bailundo Photovoltaic Park in Huambo Province has officially launched, marking Angola's largest solar energy milestone. With 1+ million high-efficiency panels across seven locations, this 370MW project can power over two million residents.
