

Austrian base station energy storage battery costs

Overview

Recent industry analysis reveals that lithium-ion battery storage systems now average €300-400 per kilowatt-hour installed, with projections indicating a further 40% cost reduction by 2030. If cheaper alternatives are available, the procurement of storage facilities is not permitted. As storage costs are included in grid fees, there is a general interest in this regulation. For utility operators and project developers, these economics reshape the fundamental calculations of grid. The Austrian authorities have offered €17.9 million from the European Agricultural Fund for Rural Development (EAFRD). Thank you for your Attention! Any Questions?

Source: Österreichs Energie, Wasserkraft und Klimawandel in Österreich (2024). The government had initially set aside €12 million for the second round of 2025 funding but was forced to nearly quadruple the budget to €48. According to the Austrian Ministry of Economic Affairs, more than 9,300 subsidy requests were submitted during the market for energy storage technologies?

A study 1 carried out by the University of Applied Sciences Technikum Wien, AEE INTEC, BEST and ENFOS presents the market development of energy storage technology. For 2020, a price of around ?

?

?

914 per kWh of usable storage.
