

# Auxiliary materials in photovoltaic bracket

## Overview

---

Currently, the common module auxiliary materials include PV busbar, PV Interconnector There are eight kinds of auxiliary materials, including PV busbar, PV interconnector, tempered glass, adhesive film, backsheet, aluminum alloy, silicone, and junction box. So what components are photovoltaic bracket accessories made of?

1. From the cost side, the top five. This article explores the four essential auxiliary materials used in PV glass production, their roles, and how they impact solar energy efficiency. Whether you're a manufacturer, engineer, or industry enthusiast, understanding these materials will help you make informed decisions. The general materials are aluminum alloy, carbon steel and stainless steel.

## Auxiliary materials in photovoltaic bracket

### What components are photovoltaic bracket accessories ...

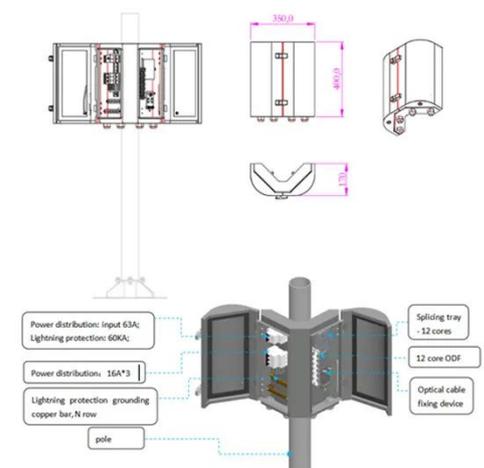

The accessories of the bracket are divided into: straight connection ...
