

## Overview

---

This facility, spanning Nueva Ecija and Bulacan, will be the world's largest single-site solar and BESS project. The first phase of the project will deliver 2,500 MW of capacity, with the entire development set to play a key role in the Philippines' transition to a low-carbon. The Philippines has officially launched its first hybrid solar and Battery Energy Storage System (BESS) facility, marking a historic milestone in the country's renewable energy development. This innovative platform is designed to rapidly accelerate the adoption of battery energy. SN Aboitiz Power (SNAP), a joint venture of Aboitiz Power Corp. In. Discover how battery energy storage systems (BESS) are reshaping energy reliability and renewable integration across the Philippines. The Philippines faces unique energy challenges: frequent power outages, high electricity costs, and growing demand from urbanization.
