

# Bahrain off-grid solar power generation system

## Overview

---

The project, which will be developed in partnership with the private sector, forms part of national initiatives to enhance the Kingdom's reliance on renewable energy sources and contributes to Bahrain's target of reaching net-zero carbon emissions by 2060. Kamal bin Ahmed Mohammed, President of the Electricity and Water Authority (EWA), has announced the commencement of work on Bahrain's first solar power plant for electricity generation, with a planned production capacity of up to 150 megawatts. To support this transition, the government is also. Bahrain's Vision 2030 outlined measures to protect the natural environment, reduce carbon emissions, minimize pollution, and promote sustainable energy. The nation is moving forward one eco-friendly step at a time. Despite its compact geography, Bahrain's flat terrain, strong solar irradiance, and high per capita energy demand present a strong opportunity for solar energy. Bahrain's first solar panels company. Since its founding in 2017, the startup boasts of contributing over two megawatts of solar to the country's energy mix -- enough to power around 380 US homes.
