

Bangkok electric grid

Overview

The notable shift to laying 1,454 kilometres of electrical wires underground is reportedly expected to take place over the coming decade, in an ambitious effort to streamline electricity provision to the three provinces in the Greater Bangkok area: Bangkok, Nonthaburi and Samut Prakan. In the early time of electricity generation development of EGAT, Thailand was expanding developments from the city to several local areas. South Bangkok Power plant is a power source constructed in response. Solar is the most affordable new source of power 3. Pumped hydro can also support higher renewables uptake 3. Retrofitting thermal power plants for hydrogen and ammonia 3. MEA Announces Success of TOU Pilot Project — 93% of Participants Cut Electricity Costs by Over. Bangkok citizens may have scoffed last year when the Metropolitan Electricity Authority (MEA) declared its grand plan to bury 1,454 kilometres of electrical cables underground over the next decade.
