

# Barbados base station energy storage battery life

## Overview

---

Q: How long can the storage system power the island?

A: 4 hours at full load, covering evening peak demand. Q: What's the environmental impact?

A: 8,200 tons of CO2 reduction annually—equivalent to planting 190,000 trees. Q: Are there expansion plans?

A: Yes, targeting 35 MW storage. The Barbados National Energy Company Ltd. These will support the national grid for additional renewable energy integration. In Barbados has launched the second phase of its Battery Energy Storage System (BESS) procurement process, a critical step in tackling ongoing grid congestion that has stalled the growth of the renewable energy sector. In 2018, The Barbados Light & Power Company Ltd @BLPC installed utility-scale energy storage as a component of the 10 MW Solar Photovoltaic (PV) plant in the north of the island at Trent's St.
