

Bird s Nest under Photovoltaic Panels

Overview

Birds nest under solar panels because the panels create a safe, sheltered environment. The gap between the panels and the roof mimics natural nesting spaces like cliffs or tree branches, offering protection from predators and harsh weather. The shaded space also stays cooler during hot days, making. The frustrating truth is that pigeons are drawn to solar panels for a variety of reasons, including the following: The view. Utilize ultrasonic devices or visual deterrents such as reflective tape, predator decoys, or holographic strips to scare birds. Still, homeowners face yet another challenge with their eco-friendly choice: birds nesting under their solar panels.
