

Bogota electricity policy

Overview

Colombia's government on Tuesday rolled out new incentives to reduce electricity consumption in the South American nation, which has been hit by a severe drought that has diminished the capacity of local hydroelectric plants and brought officials close to imposing power cuts. Colombia faces an energy crisis as rising electricity demand and a \$40B financing gap strain power supply and the national grid. Credit: Ministry of Mines and Energy. Colombia is again staring into an energy supply crossroads: More than three decades after a nationwide power crisis forced rationing, blished by the World Economic Forum as a contribution to a project, insight area or interaction. The findings, interpretations and conclusions expressed herein are a result of a collaborative process facilitated and endorsed by the World Economic Forum but whose results do not necessarily represent. Colombia has emerged as a leader in clean energy transition policy making and is an inspiring example of a fossil fuel producing country committed to climate action, based on a long-term decarbonisation pathway and a policy of energy and economic diversification and a just transition. Enel Colombia leads the Colombian market with 3.
