

Can I step on the double-glass photovoltaic panel

DISTRIBUTED PV GENERATION + ESS

Overview

So, you want to know if you can walk on solar panels?

Short answer: not recommended. Solar panels are more fragile than they look. Although they're made of tempered glass and crystalline cells, it's best to avoid stepping on them. To help you understand more about it, in this article, we explain how resistant solar panels are, how to walk on top of a solar panel properly, and what will happen if you do it the wrong way. While it might seem harmless to walk on them, it's crucial to understand why professionals should be the only ones maneuvering around solar panels. While it's physically possible.

Can I step on the double-glass photovoltaic panel

Is it safe to walk on solar PV panels?

You can likely do it a few times on several jobs, but the rails, frames and glass are NOT designed to take the point loads a human (even barefoot) adult can place on them.
