

# Can buying solar power pay off

## LIQUID COOLING ENERGY STORAGE SYSTEM

**EMS** real-time monitoring

No container design  
flexible site layout

Cycle Life

≥8000

Nominal Energy

200kwh

IP Grade

IP55

## Overview

---

For the average solar shopper, that translates to around \$61,093 in savings over 25 years. Your payback period depends on your electricity costs, system size, and how you pay for solar. Understanding what drives those differences. Federal Tax Credit Urgency: The 30% federal solar tax credit is under threat of termination by the end of 2025, making immediate action critical for maximizing savings. If you're considering them, you have two options: a hefty upfront cost of tens of thousands of dollars, or adding a monthly payment to your budget. As an investment in your home's energy expenses, solar power ROI. While the upfront costs of solar panels have dropped by over 70% in the past decade, a comprehensive lifecycle analysis includes several key components: initial purchase and installation (\$15,000-\$25,000 for an average home system), ongoing maintenance (roughly \$300-500 annually), inverter.
