

# Can rice storage boxes act as insect repellent

## Overview

---

Keeping rice in airtight containers or sealed bags can greatly reduce the likelihood of infestation. Store rice in tightly sealed containers made of metal, sturdy plastic, or glass to prevent weevils and other grain bugs from chewing through plastic. You can prevent bugs in stored rice by freezing it for 3–7 days before storage, using oxygen absorbers, or sealing it in airtight containers. These methods eliminate weevils and insect eggs without adding chemicals or affecting the rice's quality. **Why Insects Infest Rice?**

**Why Getting Rid of Insects in Rice Matters?**

**Chemical-Free Solutions on How to Get Rid.** There are several kitchen ingredients that act as insect repellents, helping to keep rice fresh and pest-free. These natural remedies have anti-bacterial properties that keep the insects away.
