

China camping charger station in Kenya

Overview

The company plans to install 100 EV charging stations by the end of 2024, marking a significant investment and signaling China's commitment to Kenya in its global EV expansion. The move reflects growing international interest in Kenya's potential to lead sustainable transportation in. A leading Chinese electric vehicle (EV) company is making a significant move in Kenya's emerging electric mobility market. This isn't just one type of charger popping up; it's a smart mix of slower AC chargers —perfect for home or office use—and the seriously powerful DC. Kenya will require \$47. According to a new policy document from the Ministry of Energy and Petroleum, the rollout will take place in three phases. It will start with 17 towns located. Here's a detailed look at how EV charging infrastructure is developing in Kenya: where infrastructure stands now, key players, and what to check if you own or plan to buy an EV here.
