

China photovoltaic panels

Overview

Wind and solar surpassed a quarter of China's electricity generation for the first time in April 2025. China is the largest market in the world for both photovoltaics (PV) and solar thermal energy. Its PV capacity crossed 1,000 gigawatt (one terawatt, 1 TW) in 2024. In 2024, China accounted for about 57% of new global solar and wind additions, which is double the amount of renewable energy generated compared to regions like the US, Europe, and India. In Abu Dhabi, United Arab Emirates, on Tuesday, . As the world's leading producer, China commands over 95% of the global market for key components such as polysilicon, ingots, and wafers. China continues to dominate the global photovoltaic (PV) landscape, manufacturing over 80% of the world's solar panels. The country's immense production capacity, relentless innovation, and competitive pricing have made it the go-to destination for businesses and individuals looking to invest in solar.
