

Colombia solar Module Project

Overview

This project is the first in Latin America to reach commercial operation under the backing and principal investment of Climate Fund Managers (CFM), with the support of the European Union, establishing a financing model that drives high-impact renewable infrastructure. Colombia, December 11 - La Esperanza, Norte de Santander — Colombia recently celebrated the inauguration of Pétalo del Norte I, the country's first solar project developed under international standards and one of the most significant recent milestones for the national energy transition. This move marks a significant pivot for Gecelca, traditionally a coal-fired thermoelectric operator, as it transitions toward renewable. Celsia SOLAR Yumbo solar energy plant in Colombia. Atlas Renewable Energy says its 201 MW solar project in Ibagué represents the company's first utility-scale installation. The programme will enable thousands of low-income households to generate their own electricity through sustainable solar solutions, under clear rules for operation, maintenance and territorial targeting. Colombia's Ministry of Mines and Energy has released for public consultation a draft resolution.

Colombia solar Module Project

Cubico Expands Colombian Solar Capacity to Over 570 MWp

Together, these projects will create over 500 local jobs during the construction phase and will utilise advanced technologies, including solar trackers, bifacial modules, and Tier 1 equipment.
