

# Communication quota base station

## Overview

---

A base station represents an access point for a wireless device to communicate within its coverage area. In the communication power supply field, base station interruptions may occur due to sudden natural disasters or unstable power supplies. Base stations typically have a transceiver, capable of sending and receiving signals. Telecom base stations often operate in remote or unmanned locations and provide critical services such as mobile connectivity, internet access, and emergency communications. However, their construction, operation and maintenance, energy consumption, and security present numerous pain points, directly. As global 5G deployments accelerate, 63% of operators now cite energy costs as their top operational pain point.

## Communication quota base station

### Communication Batteries: Why Telecom Base Stations Have Unique ...

The phrase "communication batteries" is often applied broadly, sometimes including handheld radios, emergency devices, or general-purpose backup batteries. In practice, when ...

**12.8V6AH**

Nominal voltage (V):12.8  
 Nominal capacity (ah):6  
 Rated energy (WH):76.8  
 Maximum charging voltage (V):14.6  
 Maximum charging current (a):6  
 Floating charge voltage (V):13.6~13.8  
 Maximum continuous discharge current (a):10  
 Maximum peak discharge current @10 seconds (a):20  
 Maximum load power (W):100  
 Discharge cut-off voltage (V):10.8  
 Charging temperature (°C):0~+50  
 Discharge temperature (°C):-20~+60  
 Working humidity: <95% R.H (non condensing)  
 Number of cycles (25 °C, 0.5C, 100%doD): >2000  
 Cell combination mode: 32700-4s1p  
 Terminal specification: T2 (6.3mm)  
 Protection grade: IP65  
 Overall dimension (mm):50\*70\*107mm  
 Reference weight (kg):0.7  
 Certification: un38.3/msds

### Mobile Communication Base Stations

Mobile communication base stations, as the "nerve endings" of telecommunications networks, undertake core functions such as signal coverage and data transmission.
