

Cuba installs solar energy storage project

Overview

On Saturday, Cuba initiated the installation of solar energy storage batteries at four electrical substations, marking a significant step in addressing its energy challenges. These Battery Energy Storage Systems (BESS), also referred to as "concentrator units," are being placed at Cueto 220, Bayamo. Cuba installs batteries in substations to improve the use of solar energy and address the energy crisis. Despite these advancements, power outages persist due to the lack of capacity in the electrical system. According to. The Cabaiguán photovoltaic park, with a capacity of 21.87 MW, located in the central province of Sancti Spíritus, began operations after just over two months of installation. 8. Last Friday, **Cuba** inaugurated a **solar park** in Havana, the first of an ambitious project aimed at mitigating the serious **electricity crisis** facing the island through the [use of solar energy]. The Cuban government has unveiled a bold initiative to introduce one thousand megawatts (MW) of solar energy into the National Electric System (SEN) by 2025. This effort, which involves establishing approximately fifty photovoltaic parks across the nation, aims to address Cuba's persistent energy.
