

Current status of microgrid construction

Overview

This report delves into the state of the US microgrid market and Wood Mackenzie's outlook through 2029. We are currently tracking 4,870 microgrid projects that are operational, stalled, under construction or planned. Authorized by Section 40101(d) of the Bipartisan Infrastructure Law (BIL), the Grid Resilience State and Tribal Formula Grants program is designed to strengthen and modernize America's power grid against wildfires, extreme weather, and other natural disasters that are exacerbated by the climate. Change is driven by increasing adoption of renewable energy sources, rising concerns about climate change, and rapid technological advancements. 2024 promises to be another transformative year. At Microgrid Knowledge, we write plenty of stories about the power resilience that on-site power delivers during cataclysmic events. And we also cover those which are built for every day, not just the rainy day. 5 times, bringing total to 32,470 MW by 2030. Microgrid assets are a powerful engine for change, not only for our environment and for resiliency, but also for our economy.

Current status of microgrid construction

Microgrid Overview

Section 40101(d)'s prohibition on the construction of a new electric generating facility limits the eligible uses of 40101(d) grid resilience formula grants for microgrid development. Nonetheless, costs ...
