

# Cybersecurity product sales and energy storage sales

## Overview

---

As per the latest research, the sector is seeing accelerated investments in advanced cybersecurity solutions and services to safeguard the integrity and resilience of energy storage systems against evolving digital threats. 82 billion in 2024, demonstrating robust growth driven by the rapid digitization of energy infrastructure and heightened threat awareness. The market is expected to expand at a CAGR of 13. Katherine Hutton and Lars Stephan, from energy storage integrator Fluence, take a closer look at cybersecurity compliance risks and. Utilities and independent power producers should look for energy storage solutions controlled by an energy management system (EMS), such as EVLO's proprietary EVLOGIX, that comes NERC-CIP ready. Image: EVLO Energy Storage inc. Whether you are an energy storage engineer or a business professional in the electric power generation sector, the insights discussed here will.

## Cybersecurity product sales and energy storage sales

---

### Cybersecurity as a powerful tool to enable resilient energy storage

For buyers, insurers, and financiers of battery energy storage assets, it is essential to understand the importance of cybersecurity. The landscape is changing, and proactive steps to ...
