

Dalat Power Plant is booming

Overview

Even as China's expansion of solar and wind power raced ahead in 2025, the Asian giant opened many more coal power plants than it had in recent years – raising concern about whether the world's largest emitter will reduce carbon emissions enough to limit climate change. More than 50 large coal units were commissioned in 2025, up from fewer than 20 a year over the previous decade. The city of thousands of flowers is famous for its cool climate and beautiful natural scenery, not only a tourist destination but also has the potential to. DALAD, Jul 23 (China Economic Net) - On the edge of the vast Kubuqi Desert in northern China, a quiet revolution is underway. After the project is completed and put into use, it will be.
