

# Delivery time for 100kW off-grid solar container

## Overview

---

Standard-configuration MOBIPOWER HYBRID containers ship within 6-8 weeks. Custom configurations with specific battery capacities, solar array sizing, or specialized fuel cell options require 10-14 weeks for engineering and fabrication. The Intech Energy Container is a fully autonomous power system developed by Intech to provide electricity in off-grid locations. Each container is equipped with a photovoltaic array, a battery bank, and a generator — all custom-sized to meet the specific needs of the customer. It is a complete solar setup that comes with highly efficient solar panels. Engineered for disaster response, remote sites, and temporary. We combine high energy density batteries, power conversion and control systems in an upgraded shipping container package. Lithium batteries are EVE brand, whose LFP chemistry packs 215kWh of energy into a battery volume weighing 3100kg.
