

Djibouti produces solar panels

Overview

In just one year, Djibouti has gone from having almost no solar installations and limited technical capacity to hosting several solar companies, trained national engineers and even a facility assembling the first made-in-Djibouti solar panels. While international entrepreneurs often know Djibouti for its strategic port—a critical gateway to the Horn of Africa—a closer look at its national agenda and the latest Djibouti energy news reveals a far more compelling opportunity. The country has set an ambitious goal to achieve 100% renewable. The Minister of Energy and Sustainable Development (right) and the Resident Coordinator (centre) meet with Djiboutian solar panel business owners and engineers at the first National Forum on Solar Energy (FNES 2025). This will be done in the framework of a public-private partnership (PPP). Amea Power continues its presence across its territory. The construction of the first large-scale solar generation project began in November 2022 in the Gran Bara Desert, which is located in the coastal region. To build a 30 MWp solar PV plant in Djibouti. Add solar farms, geothermal power and biomass plants, and Djibouti hopes to become the first country on the continent to supply its population with 100% renewable energy. The nation's strategic location at the Red Sea crossroads creates unique opportunities for both local energy solutions and export-oriented production.
