

# Does the Eritrean PV project need energy storage

## Overview

---

Eritrea's growing focus on renewable energy faces a critical hurdle: intermittent power supply. With solar irradiance levels reaching 6-7 kWh/m<sup>2</sup>/day – among Africa's highest – the country needs robust energy storage systems to bridge the gap between daytime generation and nighttime. In a landmark move toward sustainable energy, Eritrea is set to welcome its first solar photovoltaic energy storage plant, marking a significant step in the nation's renewable energy journey. The project, helmed by a Chinese project developer selected by the Ministry of Energy and Mines, has. To tackle these challenges, the Government of the State of Eritrea (GoSE), alongside the African Development Bank (AfDB) and UNDP, plans to develop hybrid renewable solar photovoltaic (PV) projects in the Zoba Gash-Barka region, particularly in sub-zoba of Barentu, where current mini grid systems. solar-plus-storage plant. Tanzania's Songas gas power project, a successful example of PPP. which has adversely affected other sectors terms of energy balance, there is over-dependence on biomass (woody biomass and sun-dried cow dung) which supports more tha emhare,Eritrea. [4] The government of Eritrea built a wind energy pilot project in. tery energy storage system near Dekemhare. It will also involve th m" and "Battery Energy Storage System (BESS)".

### Strategies for integrating residential PV and wind energy in Eritrea's

Storage utilization is minimal at higher feed-in limits within the range of 0.8 to 1 kW/kWp, as all generated PV energy is directly injected into the grid. In this range, storage is only partially ...
