

EU Smart Photovoltaic Energy Storage Cabinet Grid-connected Type

Overview

Modern low-voltage PV grid-connected cabinets feature a modular design, integrating intelligent protection devices, metering instruments, and communication modules. The ESS-GRID Cabinet series are outdoor battery cabinets for small-scale commercial and industrial energy storage, with four different capacity options based on different cell compositions, 200kWh, 215kWh, 225kWh, 241kWh, etc. Adopt modular design and original "building block" system, which make up by Monet 50kW power module, Monet 100kW power module and Monet 125kW power. It can be used in solar photovoltaic power generation systems, and can also be used to convert, distribute and control electrical energy between photovoltaic inverters and transformers or loads. Wide current coverage, up to 4000A, breaking capacity up to 80KA. Multiple Protections: Features overvoltage, undervoltage, overcurrent, short-circuit, and overtemperature protection functions to ensure system safety. Its core function is to convert renewable energy such as solar energy and wind energy into stable electricity, and realize energy storage, distribution and monitoring through intelligent energy. Scope of Application: The Low Voltage PV Grid-Connected Cabinet is specifically designed for distributed photovoltaic (PV) power generation systems.
