

Emergency command inverter cabinet low-pressure type

Overview

Provides full light output for a minimum of 90 min. This fast transfer inverter is 98% efficient at full load. Meets NFPA101, NFPA70, NFPA 110, OSHA, UBC, SBCCI. 7kVA Single Phase systems for Seismic Applic. 8kVA to. Simplify NFPA 101 compliance and lower maintenance costs by using our centralized emergency lighting inverters! With NFPA standards reflecting automatic testing of life safety systems and computer-based reporting of test results, our centralized Emergency Lighting Inverters are being used more now. The Emerg-Power Systems works with any type of lighting load to provide full light output for minimum 90 min. It is designed to support incandescent, fluorescent, HID*, quartz re-strike or halogen lamps. It will work into these loads at cold starts for all normally off circuits or normally on. Myers EPS has the widest selection of Inverters in the industry. With multiple system designs, featuring input voltage ratings from 120vac - 480vac and power ratings from 25VA - 50kVA, our Inverters provide you flexibility to meet nearly any application and footprint requirement without sacrificing. Uninterruptible emergency lighting inverter system 4. True no-break system, with regulated output and transient voltage protection for LED lighting, electronic ballasts, as well as all other existing and future lighting applications. Controlled Power Company engineers and manufactures the industry's.

Emergency command inverter cabinet low-pressure type

Emerg-Power Systems 3FTC Three Phase Series

Designed to meet the specialized needs of emergency lighting loads by using a solid-state pulse width modulation inverter to provide pure sinusoidal output waveform
