

Energy storage battery infringement

Overview

Energys filed a patent infringement suit against C&D for lead-acid battery grid technology used in industrial storage systems. Outcome: The court ruled partially in favor of Energys, awarding damages. Context: Contemporary Amperex Technology Co., Limited first sued its local rival China Aviation Lithium Battery in July 2021, enforcing five patents and seeking over 188 million Chinese yuan (US\$25 million) in damages. CATL has scored some victories, so far securing over 44. 53 million Chinese yuan. LG Energy Solution has said it will take a strong stance against those copying its technology following what it says is a surge in battery patent infringements, including in the ESS market. With leading battery manufacturers increasingly.

Energy storage battery infringement

Explaining IP's role in battery energy storage systems

The days when batteries were simple chemical-based means of storing energy are history. The modern and rapidly evolving age of battery power is built upon sophisticated technology and ...
