

# Energy storage battery overseas exports

## Overview

---

Which countries are energy storage batteries exported to?

Energy storage batteries are primarily exported to several key regions and nations globally, 1. including the United States, 2. Europe, particularly Germany, 3. China has a major role at each stage of the global battery supply chain and dominates interregional trade of minerals. China imported almost 12 million short tons of raw and processed battery minerals, accounting for 44% of interregional trade, and exported almost 11 million short tons of battery. After last year's severe overcapacity slump, Chinese battery firms secured about 200 overseas orders totaling 186 GWh in H1 2025. Beijing's 250 billion yuan (\$32 billion) investment plan aims to add 180 GW of new energy storage capacity by 2027. 4 GWh from January to May 2024, a year-on-year increase of 50.
