

Energy storage cabinet for battery swapping station AC

Overview

These cabinets are designed to store and manage lithium-ion batteries used in electric vehicles, allowing for quick and efficient battery swapping as an alternative to traditional charging methods. Explore reliable, and IEC-compliant energy storage systems designed for renewable integration, peak shaving, and backup power. The commercial and industrial (C & I) system integrates core parts such as the battery units, PCS, fire extinguishing system. As a professional manufacturer in China, produces both energy storage cabinets and battery cell in-house, ensuring full quality control across the entire production process. Multi-dimensional use, stronger compatibility, meeting multi-dimensional production and life applications High integration, modular design, and single/multi-cabinet expansion Zero capacity loss, 10 times faster multi-cabinet response, and innovative group control technology Meet various industrial. PSN Energy lithium battery swapping cabinet is a specialized piece of equipment used in battery swapping stations for electric vehicles.
