

Energy transition mozambique

Overview

Explore Mozambique's renewable energy transition 2025: Vast solar (23GW potential), wind (4.5GW), hydro risks, and the new strategy for 98% renewables by 2030 amid LNG competition. Mozambique's energy sector in 2025 is defined by a strategic paradox: it possesses vast, untapped renewable energy potential, yet its current electricity generation mix is overwhelmingly dominated by a single, climate-vulnerable source. The government is committed to a Just Energy Transition, i.e., inclusive and clean energy for all. This National Energy Compact serves as a roadmap for accelerating the pace of the National Electrification Strategy (NES). Additionally, Mozambique's commitment to provide access to all Mozambicans to modern, affordable and reliable energy from clean sources was. Mozambique has outlined an ambitious Just Energy Transition (JET) plan to transform its energy system by 2050.
