

# Estonia energy storage battery use

## Overview

---

The largest battery park in continental Europe was opened in Kiisa, Harju County, on Tuesday, capable of serving 90,000 households. Developers say it will bring greater energy security in the wake of decoupling from the Russian BRELL grid last year, and connection to the. The 100 MW/200 MWh battery energy storage project in Kiisa began operation on February 3 as scheduled – just two weeks after a testing fault at the facility caused the most significant disturbance to the regional power grid since Estonia's desynchronization from the Russian electricity system. Large-scale battery storage is also a key enabler for the integration of low-cost renewable energy into the electricity system. By capturing surplus renewable production when availability is high and prices are low, and making this energy available when demand increases, Hertz 1 helps maximize the. A 100MW/200MWh BESS project in Estonia has been inaugurated by Baltic Storage Platform (BSP), a joint venture (JV) between Baltic developer Evecon, French independent power producer (IPP) Corsica Sole and investment manager Mirova. This news is reported by ESS News.

**12.8V6Ah**

- Nominal voltage (V):12.8
- Nominal capacity (ah):6
- Rated energy (WH):76.8
- Maximum charging voltage (V):14.6
- Maximum charging current (a):6
- Floating charge voltage (V):13.6-13.8
- Maximum continuous discharge current (a):10
- Maximum peak discharge current @10 seconds (a):20
- Maximum load power (W):100
- Discharge cut-off voltage (V):10.8
- Charging temperature (°C):0-+50
- Discharge temperature (°C):-20-+60
- Working humidity: <95% R.H (non condensing)
- Number of cycles (25 °C, 0.5C, 100%doD): >2000
- Cell combination mode: 32700-4s1p
- Terminal specification: T2 (6.3mm)
- Protection grade: IP65
- Overall dimension (mm):90\*70\*107mm
- Reference weight (kg):0.7
- Certification: un38.3/msds

## Energy Storage: Estonia's Next Big Leap After the Solar Boom

The launch of the Auvere battery storage facility marks a turning point in Estonia's energy landscape. With a capacity of 53 megawatt-hours--enough to cover just 2-3% of Estonia's ...
