

European Energy Solar Power

Overview

In a historic milestone for clean energy, solar power became the leading source of electricity in the EU for the first time in June 2025. New data from energy think tank Ember reveals that solar accounted for 22.1% of the EU's electricity mix, surpassing nuclear and leaving fossil. From 17-18 February 2026, the SUPERNOVA project will organise three sessions at the Solar Quality Summit Europe 2026 conference in Barcelona. SolarPower Europe is the award-winning link between policymakers and the solar PV value chain. We develop and operate offshore and nearshore wind farms. We develop and construct carbon. Reducing the EU's dependence on fossil fuels, solar energy plays a key role in both the clean energy transition and the REPowerEU plan. Solar is. The EU's electricity transition reached a new milestone in 2025 with wind and solar generating more power than fossil fuels.
