

European Solar On-site Energy Brand Ranking

Overview

This analysis profiles the top 10 solar companies shaping Europe's sustainable energy future through technological innovation, large-scale project deployment, and cutting-edge solar mounting solutions. Data compiled from EU Solar Pulse Report 2025, BloombergNEF. The European solar market is experiencing unprecedented growth, with installations projected to reach 87GW annually by 2025. The EEA says that the energy sector is responsible for around 75% of the continent's emissions, so the amount of renewable energy needs to continue to rise. Across Europe. With the European Union targeting at least 30 GW of domestic manufacturing capacity by 2030 through the Net Zero Industry Act (NZIA), the focus has shifted from mere price to "non-price criteria" such as sustainability, energy security, and geographic origin. Only half of the top 10 markets installed more capacity compared to 2023, marking a contrast with previous years of widespread growth.
