

# Export version of solar modules

## Overview

---

Exporting electricity generated from solar panels involves several key steps: 1. Understanding Grid Connection Requirements, 2. Is it possible to export the data in PAN file format, not in the table form to copy and paste it into an excel sheet. The module Data is only saved in my PVsyst local data when I make changes at a module or create an own component, but I would like to export the whole datasheets of the different PV. Indian solar equipment exports to the US are set for a significant boost. Tariffs are falling, making Indian solar modules and cells more competitive. Suppose a solar plant produces more. Beijing's decision to eliminate solar export VAT rebates tackles deep structural problems: massive oversupply, unsustainable pricing, and growing trade tensions. Interestingly, the trade deal came weeks after the US pulled out of the International Solar Alliance, backed by India.
