

Financing for a 10mwh off-grid bess cabinet project

Overview

This report analyses the barriers to obtaining project finance for BESS projects, as well as highlighting the lessons that can be learnt from early BESS project finance success stories. It also explains: “The global deployment of renewable energy is dependent. While equity investors bring cash and risk appetite, debt typically funds 50-75% of project costs. But how do lenders today actually get comfortable with BESS and hybrid investments, what does it mean for project developers, and what the heck does the term “bankable” really mean?

Bankable isn't. This Practice Note discusses changes to financing structures for battery storage projects after the enactment of the Inflation Reduction Act. This Note also discusses the fixed and variable revenue sources available to battery storage projects based on the benefits they offer to electricity. The large-scale adoption of BESS needs the active participation of low-risk/low-cost capital providers and established financial sector players such as banks, pension funds, and insurance companies, better known as institutional investors. They can stack revenue streams offering arbitrage, capacity and ancillary services under regulated frameworks, long-term offtake agreements and merchant schemes. Arbitrage Increases Cash Flow Volatility.
