

Fixing method under photovoltaic panels

Overview

There are different types of solar panel mounts that can be used to fix the photovoltaic panels in place. Its main function is to fix the outer edge of the module to prevent the module from displacement or damage under wind load, snow load or other external forces. Solar PV panels can be retrofitted onto an existing roof, on top of the tiles or other roofing materials, using roof anchors (also called roof-hooks or brackets), mounting rails and solar photovoltaic system is by using a Heliomotion. Simply because. At its core, a solar mounting system is the supporting framework that secures solar panels to a surface, whether it's a rooftop or the ground. These converters of a renewable energy source - sunlight - are crucial as industries and individuals seek cleaner energy.
