

# Grid modernization trinidad and tobago

## Overview

---

Transitioning to renewable energy will require parallel development—building a new green grid alongside the existing T&TEC infrastructure. While this comes at a significant cost, funding can be secured for initiatives that are truly prioritized at the national or regional level. Why is Trinidad & Tobago's Green Energy Dream Facing Hurdles?

Unpacking the complex challenges slowing the twin-island nation's shift from fossil fuels to renewables. Economic Inertia: Deep-rooted reliance on subsidized fossil fuels creates significant market distortions, making renewables. The Government of Trinidad and Tobago is currently developing a national energy policy green paper that recognises renewable energy's (RE) combined with energy efficiency (EE) and utilisation of compressed natural gas in the transportation sector, inter-alia, as important strategies for the. This is the Energy Report Card (ERC) for 2023 for Trinidad and Tobago. The ERC also includes sectoral data and information on policies and regulations; workforce; training and capacity building; and related areas. It seeks to stimulate the national dialogue on Renewable Energy (RE) matters and to sensitize key stakeholders of the opportunities and options to advance the uptake of RE at the national level by outlining critical actions for advancing RE n Trinidad and Tobago.
