

Have the solar panels been moved

Overview

What happens to your solar panels if you move?

You have two options: leave them behind, increasing your home's value, or take them with you. This article guides you through the process and considerations involved in each choice, ensuring a smooth transition for your solar. Moving solar panels from one house to another is possible, but it requires careful planning. Solar panels, also known as photovoltaic (PV) panels, are devices that convert sunlight into electricity. Solar modules are sensitive and can easily get damaged if moved improperly. Solar panels can be a rewarding upgrade for your home, as they bring increased value through lower energy costs, enhanced independence, and a higher property value. But, if you decide to move, you're now faced with the decision to sell the system with your home or take it with you.
