

House inverter system factory in Sudan

Overview

This means a solar factory in Sudan is ideally positioned to achieve energy independence by harnessing the very resource its products are designed to capture. When planning for energy self-sufficiency, two primary models emerge: the fully off-grid system and the more common hybrid. A recent home installation project in Khartoum, the bustling capital city situated on the banks of the Nile, demonstrates just how transformative solar energy can be when paired with high-performance equipment offered at a competitive price. Sudan is geographically blessed with abundant sunlight. Empower and UNDP bring solar-powered clean water to Medani communities. Empower & UNDP deliver 84 solar water systems in Abu Hamad, a major irrigation project in Sudan with LONGi solar panels, Jntech inverters, Italian Pentax pumps, and sturdy i-section beams. ACO is the largest Solar energy distributor company in North Africa with a track record of 530 MW Solar. We aim to efficiently, ethically and fairly operate a sustainable business model to ensure Sudan and neighboring countries fulfill their energy needs utilizing eco-friendly sources. Reliable off-grid systems for hospitals and clinics; powering critical equipment, lighting and vaccine fridges.
