Overview

The project is expected to generate 1,570,000MWh electricity and supply enough clean energy to power 785,000 households. 11 (Xinhua) -- China has achieved another breakthrough in wind power development at ultra-high altitudes, with the world's highest wind power project in Xizang Autonomous Region generating over 22 million kWh of electricity as of Tuesday. Invested and constructed by companies including. Sichuan Liangshan Xichang Wind Farm is a 600MW onshore wind power project. It is planned in Sichuan, China. The goal is to maximize power generation in the spot market as strategic producers. They should submit offering prices and bid for Saudi wind projects 30. China's first high-altitude megawatt-scale wind power demonstration project was connected to the state grid on Tuesday in Jixi County, East China's Anhui Province. According to CHN Energy Investment Group (CHN Energy), the group of 25 wind.
