

How high is the outdoor power box

Overview

The required height an outdoor electrical outlet must be is a maximum of six feet and six inches above the ground. There is no minimum height required. It is also required to have all ground-fault circuit-interrupters (GFCI) protected for all outdoor receptacles. Electrical service wires overhanging pools, spas, or hot tubs must be at least 22 1/2 feet above the water or diving platform. I need to mount a disconnect box on the outside of my house for a 220V/30A run to power a sewer grinder pump.
