

How long can the aluminum-magnesium-zinc photovoltaic bracket be used

Overview

Q3:How long can zinc-aluminum-magnesium photovoltaic brackets be used?

A:The anti-corrosion property of the hot-dip galvanized layer can last for more than 30 years. The inclusion of magnesium enables corrosion. A: Zinc-aluminum-magnesium solar brackets are compatible with most photovoltaic panels that meet industry-standard sizes and mounting hole positions, but may be incompatible with photovoltaic panels of non-standard designs or with special installation requirements. Zinc-aluminum-magnesium alloy is lightweight, high-strength, and corrosion-resistant, making the photovoltaic mounting system more stable and. Recently, researchers conducted a survey at the Qinghai Gonghe Photovoltaic Industrial Park in China, and the findings indicated that large-scale photovoltaic development has had a positive effect on the ecological environment of the desert. The hot-dip galvanization process forms a dense zinc layer on the surface, effectively preventing rust and corrosion, thereby extending the service life.

How long can the aluminum-magnesium-zinc photovoltaic bracket b

ZM Ecoprotect® Solar for PV mounting systems

With ZM Ecoprotect ® Solar, thyssenkrupp Steel is now offering a zinc-aluminum-magnesium-based corrosion protection solution that is significantly more effective than conventional hot dip galvanizing, ...

◆ PRODUCT INFORMATION ◆

-  BATTERY CAPACITY
50kWh~500kWh
-  DC VOLTAGE RANGE
400V~1000V
-  DEGREE OF PROTECTION
IP54
-  OPERATING TEMPERATURE RANGE
-10~50°C

- IP65/IP55 OUTDOOR CABINET
- WATERPROOF OUTDOOR CABINET
- 42U/27U
- OUTDOOR BATTERY CABINET

Specifications of zinc aluminum and magnesium photovoltaic ...

Zinc-aluminum-magnesium photovoltaic brackets are used in centralized photovoltaic power plants nationwide, with high strength and good corrosion resistance of more than 30%.
