

# How much does a microgrid invention patent cost

## Overview

---

The \$400/\$200 non-electronic filing fee (fee codes 1090/2090/3090 or 1690/2690/3690) must be paid in addition to the filing, search and examination fees, in each original nonprovisional utility application filed in paper with the USPTO. This means each fee listed as a "Basic filing fee" in the "Patent application filing. The cost to patent an idea typically ranges from \$900 to over \$15,000, depending on the invention's complexity, type of patent, and attorney involvement. Utility patents are the most expensive, while design and provisional patents are more affordable entry points. All provided information is supported by the honourable mediation of IP-Coster members and registered. This report is available at no cost from the National Renewable Energy Laboratory (NREL) at [www.giraldezjulieta.com](http://www.giraldezjulieta.com). Giraldez, Julieta, Francisco Flores-Espino, Sara MacAlpine, and Peter Asmus. Phase I Microgrid Cost Study: Data Collection and Analysis of Microgrid Costs in the United States. It offers practical ways to predict patent costs and reduce unplanned spending. When patent applicants ask, "How much does a patent cost?"

" Most attorneys will often quote the price of the next step, which may be the cost of filing a patent or the cost of drafting. That's like building a house, but.
