

How much is the penalty for dismantling photovoltaic panels

Overview

Most contractors charge between \$200-\$500 per panel, with \$275 being the sweet spot for average-sized residential systems. A typical home solar installation has 15-30 panels, which explains why most removal projects fall into that \$4,000-\$8,000 range. Maine: As of Octo, requires developers of solar power projects occupying 3 or more acres to submit an approved decommissioning plan and financial assurance to cover the cost of solar panel dismantling. Nevada: Involves specific requirements for the recycling and disposal of solar panels. If you are disposing of solar panels that are hazardous waste, then regulations under the Resource Conservation and Recovery Act (RCRA) must be followed to make sure the panels are safely recycled or disposed of.
