

# How to install photovoltaic panels in shopping malls

## Overview

---

This guide aims to provide a detailed overview for Solar PV Installers focusing on the specialized use case of installing solar panel systems on shopping malls. By combining technical know-how with business intelligence and data analytics, installers can achieve optimal results in efficiency. Solar panels convert sunlight into electricity through photovoltaic (PV) cells made of semiconductor materials like silicon. These cells generate direct current (DC) electricity when sunlight hits them. Such solar power plants can be installed on the roofs and facades of commercial buildings and generate solar energy for their own consumption or sale of. At Orius Solar, we offer customized solar energy solutions for shopping malls, helping to reduce operating costs and meet sustainability goals. In recent years, various shopping centers have joined this trend by opting for solar installations. Shopping malls and other big-box retail facilities are the perfect places to install a solar system.
